

#### Date: April 8, 2025

Revision	Date	Changes
1.0	April 8, 2025	Initial release

The CVE-ID tracking this issue: CVE-2024-12378 CVSSv3.1 Base Score: 9.1 (CVSS:3.1/AV:N/AC:L/PR:N/UI:N/S:U/C:H/I:H/A:N) Common Weakness Enumeration: CWE-319: Cleartext Transmission of Sensitive Information This vulnerability is being tracked by BUG 997526

## Description

On affected platforms running Arista EOS with secure Vxlan configured, restarting the Tunnelsec agent will result in packets being sent over the secure Vxlan tunnels in the clear.

Arista is not aware of any malicious uses of this issue in customer networks.

### **Vulnerability Assessment**

#### **Affected Software**

**EOS Versions** 

- 4.32.2F and below releases in the 4.32.x train
- 4.31.6M and below releases in the 4.31.x train
- 4.30.8M and below releases in the 4.30.x train
- 4.29.9M and below releases in the 4.29.x train
- 4.28.12M and below releases in the 4.28.x train
- 4.27.12M and below releases in the 4.27.x train

#### **Affected Platforms**

The following products **are** affected by this vulnerability:

- Arista EOS-based products:
  - 7280CR3MK Series as below:
    - 7280CR3MK-32P4
    - 7280CR3MK-32P4S
    - 7280CR3MK-32D4S

7280CR3MK-32D4A

The following product versions and platforms **are not** affected by this vulnerability:

- Arista EOS-based products:
  - 710 Series
  - 720D Series
  - 720XP/722XPM Series
  - 750X Series
  - 7010 Series
  - 7010X Series
  - 7020R Series
  - 7130 Series running EOS
  - 7150 Series
  - 7160 Series
  - 7170 Series
  - 7050X/X2/X3/X4 Series
  - 7060X/X2/X4/X5 Series
  - 7250X Series
  - 7260X/X3 Series
  - 7280E/R/R2 Series
  - 7280R3 Series not explicitly listed above
  - 7300X/X3 Series
  - 7320X Series
  - 7358X4 Series
  - 7368X4 Series
  - 7388X5 Series
  - 7500E/R/R2/R3 Series
  - 7800R3 Series
  - CloudEOS
  - cEOS-lab
  - vEOS-lab
  - AWE 5000 Series
- Arista Wireless Access Points
- CloudVision CUE, virtual appliance or physical appliance
- CloudVision CUE cloud service delivery
- CloudVision eXchange, virtual or physical appliance
- CloudVision Portal, virtual appliance or physical appliance
- CloudVision as-a-Service
- CloudVision AGNI
- Arista 7130 Systems running MOS
- Arista Converged Cloud Fabric and DANZ Monitoring Fabric (Formerly Big Switch Nodes for BCF and BMF)

- Arista Network Detection and Response (NDR) Security Platform (Formerly Awake NDR)
- Arista Edge Threat Management Arista NG Firewall and Arista Micro Edge (Formerly Untangle)
- Arista NetVisor OS, Arista NetVisor UNUM, and Insight Analytics (Formerly Pluribus)

### **Required Configuration for Exploitation**

In order to be vulnerable to CVE-2024-12378, the following condition must be met:

Secure Vxlan must be configured.

The output of "show ip security connection" is empty if Secure Vxlan isn't configured.

```
switch> show ip security connection
Legend: (P) policy based VPN tunnel
Tunnel
                         Source
                                     Dest
                                                 Status
                                                                Uptime
                                      Time
     Input
               Output
                          Rekey
vxlansec-
default-1.0.2.1 1.0.1.1
                            1.
0.2.1 Established
     19 minutes 0 bytes 152 bytes
                                                  24 minutes
     0 pkts
               2 pkts
```

A normal encrypted connection will show the status as "established".

# **Indicators of Compromise**

The secure Vxlan tunnel will go from Established to Connected state, but packets will be sent and received successfully over the tunnel.

```
switch> show ip security connection
Legend: (P) policy based VPN tunnel
Tunnel
                         Source
                                                                Uptime
                                     Dest
                                                   Status
                          Rekey
                                      Time
    Input
               Output

0 pkts 0 pkts

# **Mitigation**

The workaround is to remove and re-apply security profiles for each secure VTEP.

## Resolution

The recommended resolution is to upgrade to a remediated software version at your earliest convenience. Arista recommends customers move to the latest version of each release that contains all the fixes listed below. For more information about upgrading see EOS User Manual: Upgrades and Downgrades

CVE-2024-12378 has been fixed in the following releases:

- 4.33.0F and later releases in the 4.33.x train
- 4.32.3M and later releases in the 4.32.x train
- 4.31.7M and later releases in the 4.31.x train
- 4.30.9M and later releases in the 4.30.x train
- 4.29.10M and later releases in the 4.29.x train

### Hotfix

No hotfix is available for this issue.
